*Green Stormwater Infrastructure Fundamentals and Design* Allen P. Davis, William F. Hunt, Robert G. Traver, 2022-06-07

Green Stormwater Infrastructure Fundamentals and Design Discover novel stormwater control measures to make for a greener tomorrow The protection of our aquatic resources is growing in importance as the effects of climate change and continued urbanization are felt throughout the world While most rain that falls onto vegetated spaces infiltrates the soil rain that falls onto impervious surfaces will not increasing downstream flooding and erosion and causing impaired water quality Impervious surfaces such as road infrastructure rooftops and parking areas all increase runoff and mobilize many pollutants that have deposited on these surfaces that are then carried into our waterways Proper management of this stormwater through green infrastructure is essential to address these challenges and reduce the environmental and ecological impacts brought about by this runoff This book brings into focus resilient stormwater control measures SCMs for the reduction of stormwater flows and associated pollutants that can detrimentally impact our local environmental and ecological systems These interventions are green infrastructure based utilizing natural hydrologic and environmental features using soil and vegetation to manage stormwater These technologies include water harvesting bioretention and bioinfiltration vegetated swales and filter strips permeable pavements sand filters green roofs and stormwater wetlands among others The basic science and engineering of these technologies is discussed including performance information and best maintenance practices Green Stormwater Infrastructure readers will also find Research informed resilient SCM design fundamentals Diagrams developed by the authors to enhance understanding Case studies to illustrate the points elucidated in the book End of chapter problems with a separate solutions manual Green Stormwater Infrastructure is an ideal resource for environmental civil and biological engineers and environmental scientists in the consulting field Landscape architects managers and engineers of watershed districts and members of federal state and local governmental agencies especially those in the departments of environmental protection and transportation will find many uses for this guidebook It will also be of interest to professors upper level undergraduates and graduate students in environmental civil and biological engineering programs

Gaston East-West Connector, I-85 to I-485 and NC 160, Gaston and Mecklenburg Counties ,2010 On the Grid Scott Huler,2010-05-11 Turn on a switch and from the nearest bulb out pours light from somewhere turn on a faucet and water appears Wires pipes and roads support the lives we lead but the average person doesn't know where they go or even how they work In *On the Grid* Scott Huler takes the time to understand the systems that sustain our way of life starting from his own quarter of an acre in North Carolina and traveling as far as ancient Rome Each chapter follows one element of infrastructure back to its source Huler visits power plants watches new asphalt pavement being laid and traces a drop of water backward from the faucet to the Gulf of Mexico He reaches out to guides along the way both the workers who operate these systems and the people who plan them *On the Grid* brings infrastructure to life and details the ins and outs of our
