

Chapter - 6: Triangles

Exercise 6.1 (Page 122 of Grade 10 NCERT)

Q1. Fill in the blanks using the correct word given in brackets:

- (i) All circles are _____. (congruent, similar)
- (ii) All squares are _____. (similar, congruent)
- (iii) All _____ triangles are similar. (isosceles, equilateral)
- (iv) Two polygons of the same number of sides are similar, if (a) their corresponding angles are _____ and (b) their corresponding sides are _____. (equal, proportional)

(i) Reasoning:

As we know that two similar figures have the same shape but not necessarily the same size. (Same size means radii of the circles are equal)

Solution:

Similar. Since the radii of all the circles are not equal.

(ii) Reasoning:

As we know that two similar figures have the same shape but not necessarily the same size. (same size means sides of the squares are equal.)

Solution:

Similar. Since the sides of the squares are not given equal.

(iii) Reasoning:

An equilateral triangle has equal sides and equal angles .

Solution:

Equilateral. Each angle in an equilateral triangle is 60° .

(iv) Reasoning:

As we know that two polygons of same number of sides are similar if their corresponding angles are equal and all the corresponding sides are in the same ratio or proportion.

- i. Since the polygons have same number of sides, we can find each angle using formula, $\left(\frac{2n-4}{n} \times 90^\circ\right)$. Here 'n' is number of sides of a polygon.
- ii. We can verify by comparing corresponding sides.

Solution:

- (a) Equal
- (b) Proportional
