Nclex Quick Pharmacology Study Guide:

Pharmacology Made Easy for NCLEX-RN Linda Waide, 2001 Chicago Review Press Pharmacology Made Easy for NCLEX-PN Linda Waide, Berta Roland, 2001 Pharmacology is the most difficult aspect of the NCLEX licensure examination for both practical and registered nurses. With new drugs introduced every day and drug interactions a more serious concern than ever before, nursing students need quick, convenient access to up-to-date drug information in order to pass their licensure exams. In a market dominated by lengthy tomes priced nearly double, the Pharmacology Made Easy study guides are the most efficient and economical review choices available. In each book, 295 carefully prepared, written test questions cover drug actions, adverse reactions, and side effects, contraindications, and precautions, interactions, nursing considerations, and therapeutic benefits for more than 600 medications. Complete rationales for correct and incorrect answers are provided. Each book includes a 100-item interactive practice test on disk. NCLEX-RN (r) - Pharmacology Study Guide Marnie Kramer-Kile, 2016-04 The purpose of this pharmacology study guide is to help nursing graduates work through the vast amount of pharmacological knowledge required for the NCLEX RN R in a systematic and purposeful way. The breadth and detail of the knowledge required of pharmacological concepts often overwhelms new graduates when they are beginning their exam preparation. This guide organizes content using the current NCLEX RN R Test Plan 2016-2019 and provides specific strategies to address pharmacological areas of review which may challenge new graduates in their exam preparation. The guide was created by an experienced undergraduate nurse educator specializing in critical thinking development and application for high-stakes exam writing. Many candidates while studying for the NCLEX RN R often forgo studying pharmacological concepts in the detail required for the exam. Unique to this Pharmacology Guide is a five-step algorithm created by the author to help graduates approach drug-to-drug interaction questions. This algorithm is designed to help uncover correct answers by using pharmacological principles rather than memorizing drugs that interact with one another. The purpose of the modules in this Pharmacology study guide series are to: Provide in-depth review of the major drug classes from a systems approach (e.g., respiratory, nervous system, etc.) to help increase retention of key concepts and encourage application of pharmacological therapy in the context of disease management; Summarize important information related to drug therapy and guide graduates to in-depth review of serious adverse events associated with medications; The modules will contain summary tables, review questions, and exercises for key concepts; Direct the reader to important areas for client assessment during drug therapy. This is a working pharmacology study guide, so while key information will be presented and organized for review, it is up to you to do the detailed work of content review by answering the questions and exercises in each module. The following resources are recommended to use with this pharmacology study guide: 1. Pharmacology textbook: This resource will contain the detailed information pertaining to drug classes and specific nursing considerations related to drug therapy. 2. Drug guide: These resources contain alphabetized drug information and outline pharmacokinetic and

pharmacodynamics characteristics of medications You will find important information related to the absorption distribution metabolism and excretions of drugs as well as protein binding and therapeutic index 3 An online drug repository if the resources above do not contain the information needed to answer the questions in the guide Each module contains practice questions using NCLEX RN R formatted questions It is recommended that you seek additional practice questions from resources that challenge you to go into pharmacological concepts such as serious adverse events and drug to drug interactions in detail and test your knowledge specific nursing interventions related to drug therapy There are a total of 12 working Modules covered in the Pharmacology Study Guide Module 1 Understanding Drug to Drug Interactions Module 2 Drugs Affecting the Respiratory System Module 3 Drugs Affecting the Nervous System Module 4 Drugs Affecting the Gastrointestinal System Module 5 Vascular and Cardiac Medications Module 6 Drugs Affecting the Urinary and Renal System Module 7 Anti Infective Medications Module 8 Drugs Affecting the Endocrine System Module 9 Antineoplastic Medications Module 10 Medications Given in Mental Health Contexts Module 11 Drugs and the Intra Ante Post Partum Client Module 12 Pain Management and Anesthesia Illustrated Study Guide for the NCLEX-RN® Exam E-Book JoAnn Zerwekh, 2018-10-25 Who says preparing for the NCLEX has to be boring Using colorful illustrations and fun mnemonic cartoons the Illustrated Study Guide for the NCLEX RN Exam 10th Edition brings the concepts found on the NCLEX RN to life This new edition is written in a concise outline format to make studying easier and the Evolve companion website includes approximately 2 500 NCLEX exam style review questions including alternate item formats allowing you to create practice exams identify personal strengths and weaknesses and review answers and rationales With new content covering culture and spirituality this study guide gives you a robust visual less intimidating way to remember key facts for the NCLEX exam 2 500 review questions are now included on the Evolve companion website adding more 200 questions to the total on the previous edition UNIQUE Mnemonic cartoons provide a fun easy way to review and remember key nursing concepts and disease processes UNIQUE The integrated systems approach incorporates pediatric adult and older adult lifespan considerations in each body system chapter UNIQUE Appendixes for each chapter summarize medications and nursing procedures for quick reference Alternate item format questions on Evolve prepare you for the interactive question types on the NCLEX examination including priority drag and drop and hot spot illustrated point and click questions Test Alert boxes in the book highlight key concepts frequently found on the NCLEX examination Answers and rationales for all review questions show why correct answers are right and incorrect options are wrong Separate chapters on pharmacology and nursing management help students to focus on these areas of emphasis on the NCLEX examination Nursing Priority boxes make it easier for students to distinguish priorities of nursing care Pharmacology tables make key drug information easy to find with high alert medications noted by a special icon Special icons distinguish pediatric and adult disorders and identify content on Self Care and Home Care NEW UPDATED content reflects the most recent NCLEX RN test plan and incorporates important clinical updates NEW 25
