1.0 METHOD OF INTEGRATION

With RS232 integration, call information is transmitted over a digital RS232 link between the PBX and the Octel system. Voice communications are provided by a separate path created by analog lines on the PBX that connect to the Octel system. When an incoming call is received, it is accompanied by a digital message from the PBX containing call information. The Octel system then answers the call and plays the appropriate greeting. To set or cancel message-waiting notification, the Octel system sends a digital message over the RS232 link to the PBX.
