Handbook of the Politics of the Arctic Leif Christian Jensen, Geir Hønneland, 2015-09-25 The Arctic has again become one of the leading issues on the international foreign policy agenda in a manner unseen since the Cold War Drawing on the perspectives of geo politics and international law this Handbook offers fresh insights and perspectives on the most pressing issues grouped under the headings of political ascendancy climate and environmental issues resources and energy and the response and policies of affected countries

An Introduction to the Green Economy Adrian C. Newton, Elena Cantarello, 2014-08-13 The green economy is widely seen as a potential solution to current global economic and environmental crises and a potential mechanism by which sustainable development might be achieved in practice Considerable investments are now being made into the development of green technology renewable energy biodiversity conservation resource efficiency recycling of materials and green infrastructure This textbook provides a comprehensive introduction to the green economy using a strongly interdisciplinary approach based on environmental science rather than treating it as a sub set of economics The scientific principles of sustainability are presented which provide the foundations of the green economy with a particular focus on systems based approaches Examples of real world case studies are used to illustrate how the green economy can be achieved in practice In this way the authors provide a thorough overview of both the principles and practice of the green economy drawing from a wide range of disciplines including ecology geography social science psychology sustainability science environmental science law and economics The emphasis is on presenting results of the latest research derived from leading scientific journals Rather than focusing on a single definition of what constitutes a green economy the book introduces readers to the diversity of opinion that exists and engages them in what is an active on going debate This reflects the fact that many aspects of the green economy and sustainable development more generally are currently contested In particular the book will help readers to strengthen their ability to critically evaluate the evidence for and against the views

presented and to actively contribute to the future development of the green economy *Supply Chain Visibility* Jonah Saint McIntire, 2016-04-01 Transparency and accurate management information are essential if you want to ensure that the supply chain is working for your business *Supply Chain Visibility* is a critical primer for readers with backgrounds in supply chain management system integration strategy consulting and enterprise software Jonah McIntire sets the stage for a new framework that empowers business leaders to connect their projects tasks or work streams back to the strategic message that it is worth applying organizational resources to supply chain visibility Drawing on research findings he reviews the prerequisites needed for a successful visibility solution and suggests a visibility fitness scorecard to compare the quality of widely varying approaches The second section of the book reviews in detail the eight most common types of supply chain visibility and offers a set of indicators of potential fit for each one The book also explains how to acquire visibility technology and the available options and includes guidance on best practice for in house designed systems If you or your organization are moving into this area Jonah s insights will place you in a far stronger position to decide exactly how to leverage the benefits of supply chain visibility solutions they also walk you carefully through the minefields of ineffective approaches or technologies to give you the greatest chance of success [World Development Report 2015](#) World Bank, 2014-12-04 Development economics and policy are due for a redesign In the past few decades research from across the natural and social sciences has provided stunning insight into the way people think and make decisions Whereas the first generation of development policy was based on the assumption that humans make decisions deliberately and independently and on the basis of consistent and self interested preferences recent research shows that decision making rarely proceeds this way People think automatically when deciding they usually draw on what comes to mind effortlessly People also think socially social norms guide much of behavior and many people prefer to cooperate as long as others are doing their share And people think with mental models what they perceive and how they interpret it depend on concepts and worldviews drawn from their societies and from shared histories The *World Development Report 2015* offers a concrete look at how these insights apply to development policy It shows how a richer view of human behavior can help achieve development goals in many areas including early childhood development household finance productivity health and climate change It also shows how a more subtle view of human behavior provides new tools for interventions Making even minor adjustments to a decision making context designing interventions based on an understanding of social preferences and exposing individuals to new experiences and ways of thinking may enable people to improve their lives The Report opens exciting new avenues for development work It shows that poverty is not simply a state of material deprivation but also a tax on cognitive resources that affects the quality of decision making It emphasizes that all humans including experts and policy makers are subject to psychological and social influences on thinking and that development organizations could benefit from procedures to improve their own deliberations and decision making It demonstrates the need for more discovery learning and adaptation in policy design and

implementation The new approach to development economics has immense promise Its scope of application is vast This Report introduces an important new agenda for the development community **Turn Down the Heat** World Bank Publications,2014-11-20 A Report for the World Bank by the Potsdam Institute for Climate Impact Research and Analytics

Copland,Derek Mueller,2017-05-30 This book provides an overview of the current state of knowledge of Arctic ice shelves ice islands and related features Ice shelves are permanent areas of ice which float on the ocean surface while attached to the coast and typically occur in very cold environments where perennial sea ice builds up to great thickness and or where glaciers flow off the land and are preserved on the ocean surface These landscape features are relatively poorly studied in the Arctic yet they are potentially highly sensitive indicators of climate change because they respond to changes in atmospheric oceanic and glaciological conditions Recent fracturing and breakup events of ice shelves in the Canadian High Arctic have attracted significant scientific and public attention and produced large ice islands which may pose a risk to Arctic shipping and offshore infrastructure Much has been published about Antarctic ice shelves but to date there has not been a dedicated book about Arctic ice shelves or ice islands This book fills that gap **The World of UCL** Negley Harte,John North,Georgina Brewis,2018-05-21 From its foundation in 1826 UCL embraced a progressive and pioneering spirit It was the first university in England to admit students regardless of religion and made higher education affordable and accessible to a much broader section of society It was also effectively the first university to welcome women on equal terms with men From the outset UCL showed a commitment to innovative ideas and new methods of teaching and research This book charts the history of UCL from 1826 through to the present day highlighting its many contributions to society in Britain and around the world It covers the expansion of the university through the growth in student numbers and institutional mergers It documents shifts in governance throughout the years and the changing social and economic context in which UCL operated including challenging periods of reconstruction after two World Wars Today UCL is one of the powerhouses of research and teaching and a truly global university It is currently seventh in the QS World University Rankings This completely revised and updated edition features a new chapter based on interviews with key individuals at UCL It comes at a time of ambitious development for UCL with the establishment of an entirely new campus in East London UCL East and Provost Michael Arthur s UCL 2034 strategy which aims to secure the university s long term future and commits UCL to delivering global impact

Introduction to Rural Planning Nick Gallent,Iqbal Hamiduddin,Meri Juntti,Sue Kidd,Dave Shaw,2015-06-30

Introduction to Rural Planning Economies Communities and Landscapes provides a critical analysis of the key challenges facing rural places and the ways that public policy and community action shape rural spaces The second edition provides an

examination of the composite nature of rural planning which combines land use and spatial planning elements with community action countryside management and the projects and programmes of national and supra national agencies and organisations It also offers a broad analysis of entrepreneurial social action as a shaper of rural outcomes with particular coverage of the localism agenda and Neighbourhood Planning in England With a focus on accessibility and rural transport provision this book examines the governance arrangements needed to deliver integrated solutions spanning urban and rural places Through an examination of the ecosystem approach to environmental planning it links the procurement of ecosystem services to the global challenges of habitat degradation and loss climate change and resource scarcity and management A valuable resource for students of planning rural development and rural geography

Introduction to Rural Planning aims to make sense of current rural challenges and planning approaches evaluating the currency of the rural label in the context of global urbanisation arguing that rural spaces are relational spaces characterised by critical production and consumption tensions
