Beyond Free College Eileen L. Strempel, Stephen J. Handel, 2021-01-15 Beyond Free College outlines an audacious national agenda consistent with but far more comprehensive than the current free college movement that builds on the best of US higher education's populist history such as the G I Bill and the community college transfer function. The authors align a wide constellation of higher education trends online learning prior learning assessment competency based learning high school college credit with a rapidly shifting student transfer environment that privileges college credit as the pivotal educational catalyst to boost access and completion. The book's agenda seeks greater productive investment in postsecondary education by privileging a single metric lower cost per degree granted as the animating driver of a transfer pathway that will fulfill the potential of its historical progressive innovators. Beyond Free College's goal is as simple as it is urgent To galvanize higher education advocates in an effort to reorganize reorient and reignite the transfer function to serve the needs of a neotraditional student population that now constitutes the majority of college goers in America and in ways that advance completion not just access to higher education *Preservice Teacher Education in Elementary Science* Ole Björkqvist, 1982 A study of science teaching insecurity in preservice elementary school teachers N 56 in Finland is presented. Based upon Maslow's theory of basic needs it was believed that individuals who feel insecure about science or science teaching cannot function at a higher need level until these insecurities are met. A 20 item instrument was used to determine an individual's self estimated proficiency in science SEPS the main independent variable. Half of the students with low SEPS and half with high SEPS took a traditional methods course which emphasized basic competencies in teaching physical science. The other half of each group took a humanistic methods course which emphasized self actualization. It was hypothesized that the traditional course would best suit students with low SEPS and the humanistic course would be better for those with high SEPS. Two other independent variables included 1 actual proficiency in science APS as determined by an achievement test in high school physics and chemistry and 2 sex Instruments designed to measure absolute and relative levels of anxiety specific to the teaching of science ASTS RATS were administered. Findings indicate that neither of the method courses was superior to the other based upon ASTS and RATS scores DC
