the latest work on the themes discussed      **Chemical News and Journal of Physical Science** ,1870      **The Chemical News and Journal of Physical Science** ,1895      *The World Multiple* Keiichi Omura, Grant Jun Otsuki, Shiho Satsuka, Atsuro Morita, 2018-11-06 *The World Multiple* as a collection is an ambitious ethnographic experiment in understanding how the world is experienced and generated in multiple ways through people's everyday practices. Against the dominant assumption that the world is a single universal reality that can only be known by modern expert science, this book argues that worlds are worlded; they are socially and materially crafted in multiple forms in everyday practices involving humans, landscapes, animals, plants, fungi, rocks, and other beings. These practices do not converge to a singular knowledge of the world but generate a world multiple, a world that is more than one integrated whole yet less than many fragmented parts. The book brings together authors from Europe, Japan, and North America in conversation with ethnographic material from Africa, the Americas, and Asia in order to explore the possibilities of the world multiple to reveal new ways to intervene in the legacies of colonialism, imperialism, and capitalism that inflict damage on humans and nonhumans. The contributors show how the world is formed through interactions among techno-scientific, vernacular, local, and indigenous practices and examine the new forms of politics that emerge out of them. Engaged with recent anthropological discussions of ontologies, the Anthropocene, and multi-species ethnography, the book addresses the multidimensional realities of people's lives and the quotidian politics they entail.

*The Securitization of Climate Change: Australian and United States' Military Responses (2003 - 2013)* Michael Durant Thomas, 2017-07-25 This book examines how the armed forces of the United States and Australia have responded to the threat posed by climate change to national security Drawing on established securitisation frameworks Copenhagen and Paris Schools the author uses a combination of quantitative and qualitative techniques to systematically examine more than 3 500 speeches policies and

doctrinal articles since 2003. Importantly, the author undertakes an examination of the intersection between the political and the military spheres, probing the question of how ideology has influenced the military's uptake on the issue. In this context, the author identifies the difficulty of an ostensibly apolitical institution responding to what has become both a hyper-political issue and an unprecedented security threat. A close examination of the key political actors, their intent, outlook, and political mandate for broader climate action is therefore crucial to understanding the policy freedom and constraints within which military leaders operate. The book consists of eight chapters divided into four parts focusing on perspectives and methodological insights, empirical case studies, case study comparison, and concluding observations. Offers a rare and systematic examination of military climate policy by a military officer from Australia. Identifies a divergence of Australian military climate policy from that of the US military during the Obama Administration. Develops a unique method that quantifies climate security, enabling a graphical representation for quick and ready reference, ideally suited to policy makers.

Experimenting with Religion Jonathan Jong, 2023. Ultimately, this book demonstrates that such scientific experiments are works of imagination that can help us discover truths about the human mind's proclivity for religious ideas as long as we can adapt and learn along the way. *Modelling, Simulating and Forecasting Regional Climate and Weather* Hans Von Storch, Frauke Feser, Martin Stendel, Yinlong Xu, René Laprise, Izuru Takayabu, 2020-09-11.
