What if your deepest anxieties and regrets are based on an illusion? What if Einstein's physics could prove it? We are living in a prison. We are haunted by regret for a past we believe is gone forever and crippled by anxiety for a future we believe is a terrifying unknown. We feel time slipping through our fingers like sand, and we call this common sense. In *The Block Universe*, Abhijeet Sarkar, CEO/Founder of the pioneering firm Synaptic AI Lab, systematically dismantles this universal belief. He argues that our common sense view of time is not just flawed; it is a complete delusion. The proof? Over a century of established, tested, and proven physics from Albert Einstein himself. With stunning clarity, Sarkar takes you on a mind-bending 34-chapter journey into Einstein's Block Universe. This is the revolutionary and scientifically accepted model of reality where all moments—past, present, and future—exist at once, permanently. The you at age 10 is not gone. The you who will be 80 is not unborn. They are both eternal coordinates in a 4D statue of your life. This leads to the most provocative, uncomfortable, and inescapable conclusion in modern science: Your destiny is already written. This idea should feel terrifying. It sounds like the end of free will, the death of meaning, the end of choice. It is the exact opposite. This book proves that accepting your true place in spacetime is the only path to genuine freedom. This is not a book about fatalism; my choices don't matter. It is a book about determinism, the profound realization that your choices are the eternal physical gears that cause your destiny. This is the key that unlocks the prison. *The Block Universe* is the antidote to our deepest human suffering. In this groundbreaking and definitive book, you will discover **THE END OF REGRET**. How to truly make peace with your past by understanding that it is not lost but is the permanent
